

eBill for Business

Benefit from the digitalization of the Swiss Payment Vision with eBill! As a business customer, you can receive and pay your invoices in a digital form with eBill for Business.

Decide how you would like to receive your eBill invoices – directly in online banking or in your own business software, seamlessly and securely.

Directly in online banking

- **Efficient:** All authorized employees can link their company with other invoice issuers through the eBill Portal to receive eBill invoices directly in online banking in the future.
- **Transparent:** All authorized employees can view and control invoices for their company, and subsequently approve or reject them for payment.

If you want to receive eBill as a business customer, your bank can support you in the integration of eBill for Business.

Customer Journey – eBill for Business in online banking

Seamlessly, in your own business software

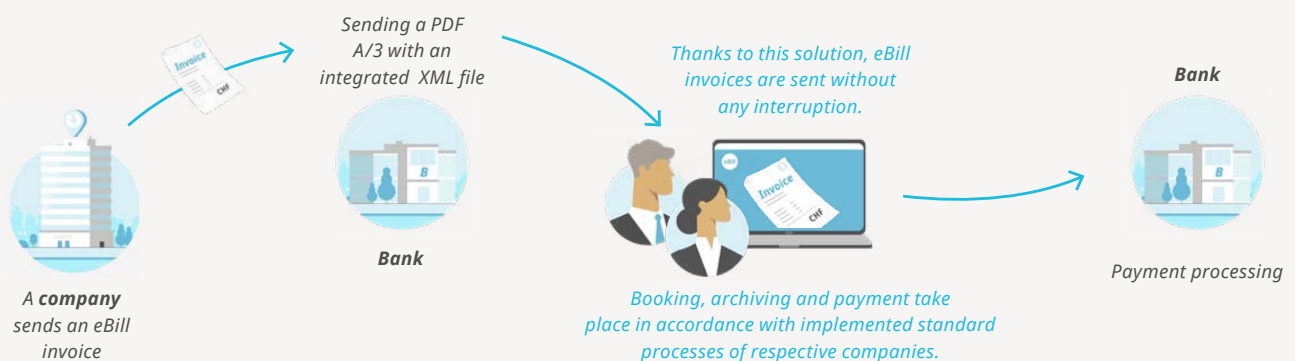

- **Proven channels:** Your bank sends you eBill invoices via channels that you already use (e.g. file transfer tools, like EBICS).
- **Simple processes:** Once the eBill invoice is received in your business software, booking and payment are carried out in accordance with your standard processes. Therefore, no adjustments to the existing processes are required.
- **Convenient archiving:** In addition to the electronic invoice data, you will also receive a corresponding PDF. The invoice receipt can thus be easily archived using the existing processes.

Your bank and software partner will support you in integrating eBill for Business into your own business software.

Customer Journey – eBill for Business Software

eBill for Business software requires the same prerequisite as eBill for Business.

Payment process

Extending the offer to business customers is another step towards supporting the eBill service as the leading digital invoice for Switzerland.
