

**Time for origami.**

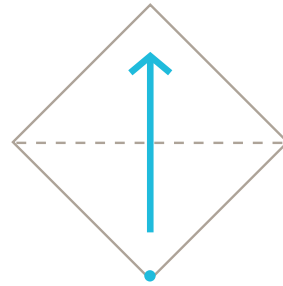

In just a few steps, we show you how to transform your payment slip into a dove. If it takes a little longer, that doesn't matter - at least, not if you're using eBill. Because paying your invoices with eBill is so fast that you will still have plenty of time afterwards. With a hobby like origami, time flies by and the dove is soon finished. We hope you have lots of fun!

1. Fold the upper or lower right corner to make a square.

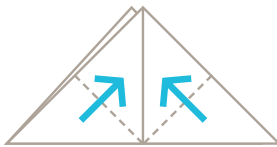

2. Cut off the excess part.

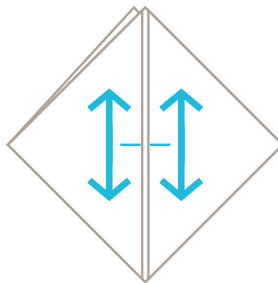

3. Turn the paper and fold it in the middle.

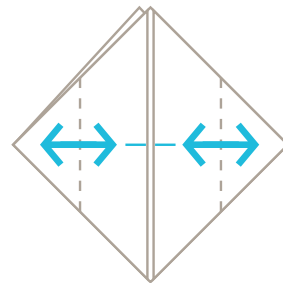

4. Then fold the opposite sides into the middle.

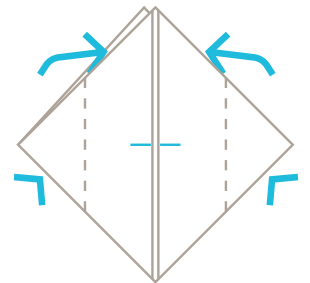

5. Fold the left and right lower corners upward to reach the tip.

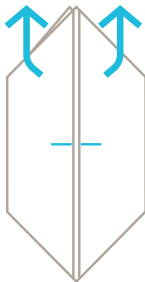

6. Fold both upper corners downward then up again in order to mark the middle.

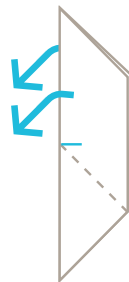

7. Fold the outer corners into the middle and back out again.

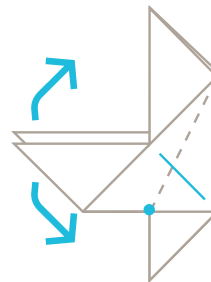

8. Along the newly created edge, bend both outer corners into the inside of the model.

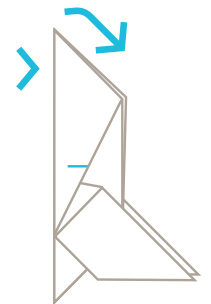

9. Fold the paper together along the long edge. When you're doing this, the surfaces facing outward must remain facing outward.

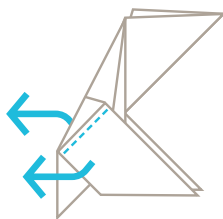

10. Fold the wings down as far as possible on both sides.

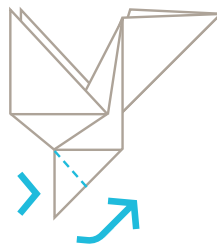

11. Fold the wings outward on both sides on the line that has been made.

12. Now fold the other way, taking the upper tip to the right.

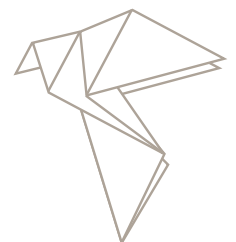

13. Fold the wings upward, along that same line.

14. Form a beak by folding the other way, bringing the lower tip inside the model.

15. Turn the model around.

16. The dove is finished.
